### SUMMARY

I am a Frontend Developer with robust experience in building responsive and scalable web applications utilizing React.js, Next.js, and modern JavaScript (ES6+). I possess strong skills in component-based architecture, state management using Redux Toolkit, and REST API integration. Currently, I am expanding my knowledge into full-stack development with MongoDB, and I am passionate about writing clean, optimized, and reusable code

### EDUCATION

Bachelor of Computer Science Engineering

Scope College Of Engineering

Bhopal (M.P)

05/2021 - 05/2025

### LANGUAGES

English (Proficient)

Hindi (Proficient)

### SKILLS

**FrontEnd:** , React, Next.js, JavaScript, ES6+, HTML5, CSS3, React Hooks, Tailwind, Bootstrap

**StateManagement:** Redux Toolkit, React Hooks (useState, useEffect)

**Tools:** Git, GitHub, VS Code

**Concepts:** Component Reusability, Performance Optimization, API Integration

### PROJECTS

E-Commerce Web Application (React.js)

E-Commerce Web Application

Date period

- Developed dynamic product listing with API integration
- Built 10+ reusable components (Header, Footer, Product Card, Cart Item)
- Implemented cart functionality with state management
- Optimized re-renders using proper component structure
- Designed fully responsive UI (Mobile + Desktop)

Hotel Booking Platform

Hotel Booking Platform

Date period

- Developed a responsive hotel booking platform enabling users to search, book, and modify reservations in real time
- Implemented dynamic search and filtering functionality using JavaScript
- Built interactive booking forms with validation for improved data accuracy
- Optimized UI workflow, reducing booking process time by 40%
- Designed clean, user-friendly interface for seamless navigation across devices

Admin Dashboard

Admin Dashboard

Date period

- Developed modular dashboard layout using reusable components
- Implemented conditional rendering and state management
- Displayed dynamic data in structured tables
- Focused on performance optimization and clean UI design
